

MD JAINUL HAQ KHAN

Frontend Developer | React.js | Next.js | JavaScript

Noida, Delhi NCR, India | +91 7631975588 | jainulhk.dev@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

React.js Developer with 3+ years of hands-on experience building production-grade applications using React.js and Next.js, backed by 8.1 years of overall frontend development experience. Skilled in React Hooks, Context API, Redux Toolkit, reusable component architecture, and REST API integration, with strong command over JavaScript, TypeScript, Tailwind CSS, HTML5, and CSS3. Experienced in Next.js App Router, SSR/SSG, dynamic routing, lazy loading, code splitting, and SEO optimization for high-performance web applications.

TECHNICAL SKILLS

Frontend: React.js, Next.js, JavaScript ES6+, TypeScript, HTML5, CSS3, JSX

React.js: React Hooks, Functional Components, Props, State Management, Context API, Redux Toolkit, React Router, Reusable Components

Next.js: App Router, SSR, SSG, Dynamic Routing, API Routes, Metadata, SEO Optimization

API & Data: REST APIs, Axios, Fetch API, JSON, CRUD Operations, API Integration

UI & Styling: Tailwind CSS, Bootstrap 5, Responsive Web Design, Mobile-First Development, Pixel-Perfect UI, Cross-Browser Compatibility

Performance & SEO: Core Web Vitals, Lazy Loading, Code Splitting, Image Optimization, Technical SEO, Semantic HTML

Tools & Deployment: Git, GitHub, NPM, Vercel, Netlify, Figma

PROFESSIONAL EXPERIENCE

Frontend Developer — Indai Technologies

Aug 2024 – Present

- Built responsive React.js and Next.js web applications on a reusable component architecture, cutting new-feature UI development time by an estimated 25–30%.
- Engineered a shared component library spanning dashboards, forms, and data-driven pages, standardizing UI patterns across 10+ application modules.
- Connected backend REST APIs using Axios and Fetch to power form submissions, data retrieval, and real-time workflows across the application.
- Managed complex UI state across 5+ application modules using React Hooks and Context API, applying dynamic routing and reusable state patterns to improve scalability.
- Reduced initial page load time by up to 35% through lazy loading, code splitting, and image optimization.

Frontend Developer — Infoicon Technologies

Nov 2022 – Jul 2024

- Built data-driven frontend features using React.js, React Hooks, and reusable components across 8+ application modules, cutting duplicate code by an estimated 20% through shared UI patterns.
- Connected 10+ backend REST APIs using Axios and Fetch API to support dynamic data retrieval, form submissions, and real-time application workflows.
- Applied lazy loading, code splitting, component-level optimization, and asset compression, reducing average page-load time by up to 25%.
- Collaborated with a 6+ member cross-functional team of backend developers, UI/UX designers, and QA engineers in an Agile environment, shipping production-ready features across 15+ sprints.
- Debugged and resolved 40+ frontend issues, improving application stability, usability, and cross-browser compatibility across production interfaces.

UI Developer — B. Jain Publishers

Jun 2021 – Oct 2022

- Produced 10+ responsive websites and user interfaces for publishing-industry clients using HTML5, CSS3, Bootstrap, and jQuery.
- Converted design files and UI requirements into pixel-accurate, responsive, cross-browser compatible web pages.
- Built and standardized reusable interface elements, preserving consistent layouts and styling across 6+ website sections.
- Partnered with a 4-person design and development team to ship UI improvements on a weekly release cycle.
- Tested and refined interfaces across browsers and devices, resolving layout and responsiveness issues before release.

Web Designer — Goyal Brothers Prakashan

Jul 2018 – May 2021

- Delivered 15+ responsive websites and web pages using HTML5, CSS3, Bootstrap, and jQuery, supporting day-to-day website development.
- Converted design concepts, PSD/layout files, and requirements into responsive HTML/CSS interfaces with accurate spacing, typography, and visual structure.
- Built and updated 20+ website pages, navigation sections, forms, banners, and reusable UI elements based on evolving project requirements.
- Created responsive layouts for desktop, tablet, and mobile, testing interfaces across 5+ browsers and screen sizes.
- Performed UI testing and troubleshooting, identifying and fixing layout, alignment, and cross-browser compatibility issues.

KEY PROJECTS

INTELLISPINE — Hospital Management System Website

Tech Stack: React.js, JavaScript, REST APIs, Axios, Tailwind CSS, CSS3

- Built a 3-panel Hospital Management System (Super Admin, Admin, Dashboard) centralizing hospital operations.
- Established doctor management workflows covering availability, leave schedules, duty timings, specialization, and room assignments.
- Built patient management workflows covering registration, appointments, consultation history, and doctor-wise patient records.
- Applied patient visit and fee management to track consultation history, visit counts, consulted doctors, and payment records.
- Connected 10+ REST APIs using Axios and Fetch API to power form submissions, data retrieval, and application workflows.

IndiaResultLive — Government Job & Exam Portal

Tech Stack: React.js, Next.js, JavaScript, Bootstrap, REST APIs, SEO, Dynamic Routing

- Built a responsive, SEO-focused web application using Next.js and React.js.
- Connected REST APIs to deliver dynamic content and application data.
- Applied dynamic routing and SEO-focused page structures.
- Improved organic search visibility through technical SEO and optimized page implementation.
- Achieved 70K+ Google Search impressions and 1.4K+ organic clicks within 28 days.

ConvertHub360 — Online Utility Platform

Tech Stack: Next.js, JavaScript, REST APIs, Bootstrap 5, SEO

- Built a responsive web application using Next.js and JavaScript.
- Connected Web APIs and REST APIs to power core application functionality.
- Applied responsive UI using Bootstrap and reusable frontend patterns.
- Applied SEO-focused frontend practices to improve search visibility and page structure.

KEY HIGHLIGHTS

- 8.1 years of total frontend development experience, including 3+ years of hands-on React.js and Next.js experience.
- Designed and built IntelliSpine, a 3-panel Hospital Management System covering Super Admin, Admin, Dashboard, doctor, patient, appointment, room, visit, and fee management.
- Delivered 15+ responsive business and web projects, translating UI/UX designs into production-ready interfaces across desktop, tablet, and mobile.
- Grew IndiaResultLive to 70K+ Google Search impressions and 1.4K+ organic clicks within 28 days through technical SEO and frontend optimization.

EDUCATION & CERTIFICATIONS

Bachelor of Arts (B.A. Hons.) — Magadh University, Bodh Gaya

JavaScript ES6 Certification — Unstop

ReactJS Certification — Unstop
